Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Robert et al (US 6,085,368).

Robert et al discloses a person handling system comprised of an overhead support track 90 and a carriage 94, with wheels 100, which moves along the track 90. Attached to the carriage 94 is a winch assembly 1 for raising and lowering the person. Also attached to the carriage 94 is an electric motor 33 for powering the carriage 94, and a clutch assembly. The clutch assembly, which is not numbered but described in column 2 lines 4-11, allows the carriage 94 to engage or dis-engage the electric motor 33. This allows the carriage 94 to be moved by the motor 33 or manually. The electric motor 33 can be drive by standard electrical wiring or by rechargeable batteries as described in column 10 lines 29-47. The battery box 175 is shown in figure 19. The electric motor 33 drives a worm drive shaft 44 for moving the carriage 94, the drive shaft 44 is reversible, allowing the motor 33 to turn the shaft 44 in opposite directions allowing the carriage 94 to move forward or backward along the track 90.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robert et al in view of Capaldi et al (US 5,809,591).

Robert et al discloses the person handling system as disclosed above and comprised of a track, carriage and motor and other components. However, Robert et al does not disclose the use of multiple tracks or multiple carriages. Capaldi et al discloses a person handling system comprised of a transverse rail 28 as well as laterally extending tracks 30. The device is further comprised of additional carriages 56 displaced by wheels 58 along the tracks 30. It would have been obvious to one of ordinary skill in the art to have added additional tracks and carriages, like that of Capaldi et al, to a system like that of Robert et al to allow for a person to be moved to all points of a room for full access to the room.

Response to Arguments

Applicant's arguments filed December 20, 2004 have been fully considered but they are not persuasive. Applicant argues that the prior art of Robert et al does not disclose the features as recited in the instant claims. The prior art of Robert et al clearly discloses a carriage system for moving an individual as shown in figures 9-12. Robert et

al further discloses a means for moving the individual as shown by the motor and winch assembly as described in the specification of the prior art.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Twitchell et al (US 4,243,147), McCord (US 4,372,452) and Guldman (W) 88/09159) all disclose types of overhead person handling systems.
